

“Immaculate Dream”

-Freddy's Story

Freddy, who comes from Allentown, PA, just arrives RPI and becomes a freshman. Neither his families nor he could imagine that all the colleges he applied, which are the top schools in this country, have accepted his applications. As a faithful fan of the engineering, Freddy chose RPI finally and wanted to complete his immaculate dream.

What is his “immaculate dream”? Freddy always rejected the activity proposals even if there was only a format mistake, when he was employed as the chairman of the student government in high school. He entirely expects that the officers of the RPI Student Union, who should have a thoughtful and rigorous work habits.

The same thing happened when he was taking the Robots Competition. One of his team members made a mistake in the calculation so the robot doesn't work well as they thought it should be. Freddy called all his team members and rebuilt the robot even it is one day left before the final competition. He always believes that science should change the name if it is not perfect and precise.

Are those all? Definitely not! He got a big trouble when he was using the student information system in his high school. As a crazy hockey fan and a ‘professional’ soccer player, he got a real dramatic nightmare that he couldn't check the game schedule in the system. He could never imagine if the SIS in RPI has the same situation.

The night before he flew to RPI, he had a long and beautiful dream. Not only Freddy, but his families attend the RPI. They book the tickets for the weekend's soccer game, and register the Roger's course UCD course together. Fortunately, he also gets a family dinner coupon for the most popular cafe in Troy.

“Glad to Meet You, I am Juney.”

-Juney's Story

Every day for Juney is a busy day. Finals Game of The College Basketball was hold tonight. There was no doubt that RPI won again and Juney get the MVP. Although Juney was so happy, she had to refuse the invitation to the party. She needed to go back and prepare the forms and documents for the next day's work.

Juney comes from Palo Alto, CA. Her family has located there for many years. Her sister, Madison, was the first person who attended RPI and got the bachelor's and master's degrees. From then on, RPI became Juney's dream because she wished herself to become the as successful person as Madison.

In 2011, Juney was accepted by RPI. She felt deep love in the town called Troy and devoted herself to learning the business. As a finance student in Lally Management School, Juney got top scores in all the courses and a perfect co-op job in NIKE SPORTS, where she found the importance of knowing the psychology. Recently, she entirely wants to equip herself with a strong combined-background of business and psychology, in order to make the best performance in the future career.

In addition, she is also a crazy fun of the classic music. Although she has stopped playing the piano after high school, she still keeps that kind of zealous feeling of the music. She can register early so she is intending to get another minor in music.

However, there is a big problem that the registration process becomes badly complicated in her situation. Juney entirely trusts the Student Information System at RPI, which could help her to check the courses of Psychology and Music. She can almost imagine that she will attend the first psychology and music classes.

“Hello everyone, glad to meet you. I'm Juney.”
